Among the Pailies of the Age
which the introduction of Scondont long
since exploided, was the use of abrasive
and corrosive tooth preparations, which
either contained minerals which scatched
their ename, or acids which dissolved it.
Scondont, a health promoting substitute
for these empirical articles, is a botanic,
skillfully perpared, highly sanctioned
preparation, which not only beautifies,
cleanses and invigorates safforn colored
and defective teeth, but divests the breath
of an objectionable odor and restores to
it to that of health.
